

Tubes

Material: Polypropylene or Aluminium

Size: 5s, 10s, 15s, 20s

* Tube dimensions are based on standard 25mm diameter tablets. Other tubes sizes are available to suit various tablet sizes.

Sachets

Material: Polypropylene or Aluminium

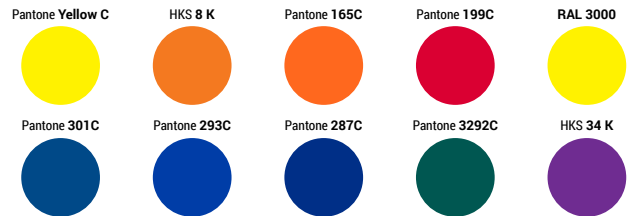

Size: 5s, 10s, 15s, 20s

Tube Closures with Desiccant

Tube closures are available in a range of colours and with a range of desiccant compositions to suit different climatic conditions.

Tube Printing Techniques

There are two types of printing that can be applied to our tubes.

Letterset Printing

Fast printing with up to 8 colours

Letterset printing permits higher printing speeds and is thus well suited for medium to high volumes. Printing is possible in spot colours only (PMS/HKS) enabling standardised results and strict adherence to brand and style guidelines.

Advantages

- High printing speed and quality
- Great flexibility in formats and batch sizes
- Short lead times due to high printing capacity
- Efficiency benefits in large batches
- Standardized printing of up to 8-colour works (PMS / HKS)
- Application of low-migration paints and varnishes

IML Process (20s tubes only)

Maximum printing quality for sophisticated solutions

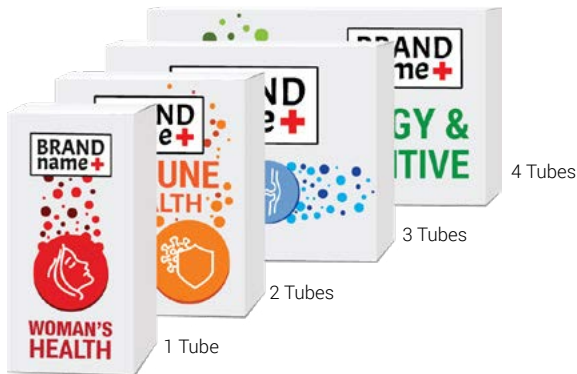

With the In-Mould-Labeling (IML) method, pre-printed labels are inserted directly into the injection moulding tool. The IML process offers possibilities which cannot be realised by Letterset printing, e.g. CMYK-printing and special finishings such as metallic effects.

Advantages

- CMYK (4-colour) printing instead of only spot colours
- Metallic effects, Gloss or Matte or Rough laminate
- Higher resolution for small text and images
- IML indicates high quality at the point of sale and is particularly suited to optically demanding products

Tube Unit Cartons

- 1, 2, 3 or 4 Tube pack sizes
- Maximum 8 colour printing
- Foil, Gloss or Matte finishing
- Tamper Proof Seals or Shrinkwrap

Sachet Unit Cartons

- 10s, 20s, 30s or Custom pack sizes
- Maximum 8 colour printing
- Foil, Gloss or Matte finishing
- Tamper Proof Seals or Shrinkwrap

Effervescent Tablet Trays

- Plain or Printed with up to 8 colours
- 12 Tubes per Tray (automated production process)
- Other Tray Sizes are available but require manual production process

Effervescent Tablet Display Shippers

- Tube Tray with Header Card
- Printed with up to 8 colours
- 6, 8, 10 or 12 Tubes per Tray
- Available in various designs, e.g. with perforated cover
- Manual production process

Sachet Display Shippers

- Sachets can be packed as Singles or Perforated Strips, e.g. 1 x 2
- Displays can be with or without header
- Maximum 8-colour printing
- Various designs available including with perforated cover
- Manual production process

AWS360 is a leading B2B partner of Vitamin, Supplement and OTC Brands providing our customers with a 360-degree end-to-end service to develop, manufacture, supply and market successful consumer healthcare products to support a healthier society.

FSC-certified forests have environmental, economic and social benefits. As the world's most trusted sustainable forest management solution, FSC labelling tells customers that the materials used originate from sustainable and legal sources.
