

Rehydration Electrolyte

ORANGE FLAVOUR
EFFERVESCENT TABLETS

Relieves symptoms of dehydration and helps replace water and electrolytes lost due to vomiting, diarrhoea, heavy sweating, vigorous exercise and occasional hangovers. Drink Rehydration Electrolyte when thirsty or exhibiting signs of dehydration. Sip slowly and frequently whilst symptoms of dehydration persist.

Potential Claims*

- Relieves symptoms of dehydration
- Rehydrates you faster than water alone
- Helps restore body electrolytes after vomiting and diarrhoea
- Relieves muscle cramps
- Use if experiencing signs of dehydration: sticky or dry mouth, increased thirst, lethargy, decreased urine output, dark yellow urine

Effervescent Tablets Features & Benefits

- Wide range of natural flavours & colours with your preferred sweeteners
- Effervescent tablets produce a nice fizzy flavour and are pleasant to drink often resulting in compliance or repeat usage
- A great dosage form for people who find oral tablets difficult to swallow (dysphagia)
- Popular with kids, adults and seniors
- Effervescent tablets have already started dissolving by the time they reach your stomach, meaning they can be absorbed efficiently and are gentle on the stomach
- High dose of Active Ingredients is possible due to large tablet sizes
