

Vitamin C & Calcium

LEMON FLAVOUR
EFFERVESCENT TABLETS

Both vitamin C and calcium play important roles in building, maintaining, and preventing the break down of bone. While calcium helps to form bones vitamin C's role in collagen production makes it essential to the repair and maintenance of children's bones and teeth.

Potential Claims*

- Vitamin C is known for its role in immune function and ascorbic acid is required for normal functioning of the immune system
- Supports bone health
- Supports normal muscle function

Effervescent Tablets Features & Benefits

- Wide range of natural flavours & colours with your preferred sweeteners
- Effervescent tablets produce a nice fizzy flavour and are pleasant to drink often resulting in compliance or repeat usage
- A great dosage form for people who find oral tablets difficult to swallow (dysphagia)
- Popular with kids, adults and seniors
- Effervescent tablets have already started dissolving by the time they reach your stomach, meaning they can be absorbed efficiently and are gentle on the stomach
- High dose of Active Ingredients is possible due to large tablet sizes

* These claims are general in nature and have not been assessed according to specific regulatory requirements.
